

Structured Cabling

Product Line Brochure

High Performance and Reliable Solution

Infinique structured cabling products are manufactured to international standards and are certified for performance and safety by industry leading third party laboratories making them an ideal choice for communication and data backbone infrastructure. Our end-to-end product line, superior quality coupled with excellent technical support and service provide peace of mind and a great value for your investment.

Fiber Systems

Infinique has a high quality end-to-end solution for fiber cable and components that are designed for optimal performance of next generation fiber backbone and FTTH applications. With our complete product line you can design and manage future data network needs that bring value to you and your customers.

Copper Systems

We provide a wide range of copper solutions for your network requirements in telephony and high-speed data transmission. Our cables and accessories are designed to guarantee best transmission rates and provide optimum network bandwidth for your most critical applications.

Conformance

Infinique products are manufactured from high quality materials and are fully compliant with the industry standards providing customers the confidence about guaranteed product performance.

For over a decade, innovation and excellence in quality have been the driving force behind Infinique's success. The end-to-end solutions strategy gives our customers the flexibility to deploy our products on projects of any size.
